
Eye Wash Station Flow Switch

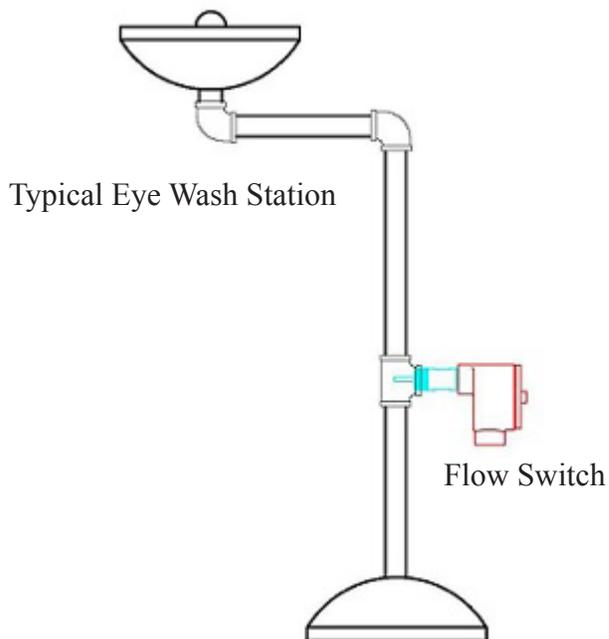

- Reliable No Moving Parts Design
- Easily Detects 0.4 GPM Eye Wash Flow
- Explosion Proof for Hazardous Areas
- 316L Stainless Steel Sensor
- Large Inventory & Same Day Shipment
- NEMA 4X for Tough Environments

FX Series Flow Switch

[Brochure \(PDF\)](#)
www.ameritrol.com

The FX series eye wash flow switch provides reliable service at the low flow rates required by eye wash station applications. The FX Series no moving parts design is perfect to detect the low 0.4 gallons per minute flow rates of an eye wash event and yet reliable enough to detect future events even after long periods without use. The relay output can be used to sound an alarm, turn on an emergency light or send a signal to a control room for emergency help.

The FX series eye wash station flow switches are designed to provide reliability in low flow conditions at a very cost effective price.
